

Dynamic Networking for Small Business: “DyNet–Erie”

What is DyNet-Erie?

DyNet-Erie is a government contracting conference held in Erie, Pennsylvania. The event features representatives from federal & state agencies, government prime contractors and business resource exhibitors as well as several breakout training workshops. DyNet-Erie makes a host of resources available to small businesses and provides networking opportunities to match capabilities with multiple government agencies and prime contractors, all in one day at one convenient location.

Small Business attendees are encouraged to maximize their time networking as well as take advantage of the learning opportunities offered. Plus, organizations that support small businesses in the federal market will also be on hand to share their expertise.

DYNET-ERIE IS FREE TO ATTEND.

We are making decisions on how to handle DYNET-Erie this year *(originally scheduled for 8/20/20)*

*Please watch for notices & announcements from the Northwest Commission PTAC,
as we may modify plans in light of COVID-19.*
